Middlebury College
Center for Careers and Internships
If you are interested in pursuing a career in a STEM field (science, technology, engineering, and mathematics), here are steps to get you started:

- What are the STEM majors at Middlebury?
  - Biology
  - Chemistry & Biochemistry
  - Computer Science
  - Environmental Studies
  - Geology
  - Mathematics
  - Molecular Biology & Biochemistry
  - Neuroscience
  - Physics
  - Psychology
- Meet with one of the STEM advisors in CCI.
- Attend information meetings: Gain an overview of the unique requirement in these fields; discover interesting internship opportunities; learn how to become a competitive candidate.
- Begin to work on your networking skills to connect with people who can help you create or find your own internship, or who can offer career advice. A great networking resource is MiddNet. Use it to connect with Middlebury alumni who can give you important career information and advice.
- Look for ways to incorporate research opportunities into your resume. Read below in the Gaining Experience section for suggested opportunities.
- Read the Science and Technology blog. Find leads on opportunities for relevant experience; keep abreast of pertinent lectures and presentations; learn what fellow STEM students are up to.
- Many of our STEM majors are also interested in Careers in the Common Good (CCG). We highly recommend subscribing to the Social Impact blog and meeting with Tracy Himmel Isham, Career Advisor at CCI.
- Join student orgs related to your interests.
- LinkedIn is the winning social media tool for business networking. LinkedIn Groups can help you form new connections. Start with Middlebury groups and reach out to alumni. Follow businesses you admire and treat your profile like a professional brochure.
Gaining Experience in STEM Fields

The pages listed below contain useful links to employers’, organizations’, and career search websites, both for general resources and by career area.

Please note: Middlebury College and the Center for Careers and Internships do not necessarily endorse or support the organizations, companies, programs, and or websites listed on these pages.

Undergraduate Research Summer Opportunities and Helpful Resources

Here is a helpful online database of options

Biology

Summer Opportunities
- Minority Health Disparities Research Opportunities (MHD), University of Arizona, Arizona, AZ
- The Summer Undergraduate Research Experience (SURE) Program, Keck Graduate Institute, Claremont, CA
- Summer Undergraduate Research in Biology, Pepperdine University, Malibu, CA
- Summer Undergraduate Research Fellowship (SURF), Pasadena, CA
- Summer Research Training Program, UC San Francisco, San Francisco, CA
- California Alliance For Minority Participation (CAMP), University of California Santa Cruz, Santa Cruz, CA
- Significant Opportunities in Atmospheric Research and Science (SOARS), National Center for Atmosphere Research (NCAR), Boulder, CO
- Summer Multicultural Access to Research Training (SMART), University of Colorado, Boulder, CO
- The Summer Health Professions Education Program (SHPEP) (Several sites across the U.S.)
- Department of Energy & Environmental Protection (DEEP) Internship Program, CT
- Carnegie Institution Geophysical Laboratory, Carnegie Institution of Washington, Washington, DC
- Entry Point, American Association for the Advancement of Science, Washington, DC
- Student Research Participation Program, Argonne National Laboratory, Argonne, IL
- Summer Honors Undergraduate Research Program, Harvard Medical School, Boston, MA
- Summer Undergraduate Research Program, Lincoln Laboratory, MIT, MA
- NSF Research Experience for Undergraduates (REU Program), Tufts University, Boston, MA
- Scientific Summer Scholars Program, Novartis Institutes for Biomedical Research, Cambridge, MA
- US Summer Student Worker Program, Pfizer, Cambridge, MA
- National Cancer Institute Summer Internship Program, Division of Cancer Epidemiology and Genetics (DCEG), Bethesda, MD
- Research and Training Opportunities: General, National Institutes of Health, Bethesda, MD
- Biomedical Engineering Summer Internship Program (BESIP), Bethesda, MD
- Summer Enrichment Program in Health Management and Policy, University of Michigan School of Public Health, Ann Arbor, MI
- Biomedical & Life Sciences Summer Fellowship, University of Michigan, Ann Arbor, MI
- Biomedical Research Apprenticeship Program, Washington University, St. Louis, MO
• Life Sciences Undergraduate Summer Research Program, University of Minnesota, Saint Paul, St. Paul, MN
• National Institute of Environmental Health Sciences, Research Triangle Park, Durham, NC
• Mt. Sinai Summer Undergraduate Research Program, Mt. Sinai, New York, NY
• Undergraduate Summer Research Program, Cold Spring Harbor Laboratory, Cold Spring Harbor, NY
• Lamont-Doherty Earth Observatory, Columbia University, New York, NY
• Sloan-Kettering Undergraduate Research Program, Sloan-Kettering Cancer Center, New York, NY
• Undergraduate Research at University of Nevada, Reno, NV
• Summer Internships in the Biological Sciences, University of Pennsylvania, Philadelphia, PA
• REU Summer Internship-Institute for Tropical Ecosystem Studies, University of Puerto Rico
• Pediatric Oncology Education (POE) Program, St. Jude Children's Research Hospital, Memphis, TN
• Summer Medical and Research Training Program (SMART), Baylor College of Medicine, Houston, TX
• Summer Undergraduate Research Fellowship (SURF), University of Texas, Dallas Southwestern Medical Center, Dallas, TX
• Summer Research Program in Cell and Molecular Biology, University of Wisconsin, Madison, Madison, WI
• National Oceanic and Atmospheric Administration (NOAA)
• The Genetics Society of America
• RISE DAAD, (Research Internships in Science and Engineering): In Germany. Engineering, Biology, Chemistry, Physics, Earth Sciences
• The Leadership Alliance Summer Program, (Several sites across the U.S.)
• Merck Summer Pharmaceutical Research Internship, (Several sites across the U.S.)
• NASA Student Research Program, (Multiple locations)

General Information Resources

**The Journal of Young Investigators: Extensive list of Undergraduate Summer Research Opportunities**
This list currently has 100+ undergraduate summer research internships available to college students, and internships are being added regularly. This list has stood out in the scientific community because there are opportunities in all fields of science and because it is constantly updated and maintained by the undergraduate staff at JYI.

**NSF Research Experiences for Undergraduates**
National Science Foundation's listing of undergraduate programs

**Science Classified Ads**
Information on science careers, including employer profiles, links, career fairs, advice, and the option of signing up to be notified of new job openings

**Summer Internships in Biology**
Internship programs in biomedical laboratory research, marine biology, ecological and environmental sciences, other biology, and for students of disadvantaged backgrounds or minorities

**Registry of Undergraduate Researchers and Graduate Schools**
A free service that facilitates match-making between undergraduates with research experience and a desire to pursue an advanced degree, and graduate schools or employers seeking high quality students who are well prepared for research.

**The Sloan Career Cornerstone Center**
For science, technology, engineering, mathematics, computing, and medicine career planning.

**Oak Ridge Institute for Science and Education (ORISE)**
Summer research opportunity listings.

**NewScientist Jobs**
Searchable database with hundreds of jobs in the sciences.

**Great Opportunities from the Rochester Institute of Technology Website**

FAQs

Is it true that STEM is only for a select number of students interested in careers in math and science?

Not at all. While increasing the number of students who choose careers in STEM fields is certainly one objective driving STEM education, it is only part of the story. STEM education develops skills that have a much broader application. STEM emphasizes collaboration, communication, research, problem solving, critical thinking and creativity – skills that all students need to be successful in today’s world, regardless of specific interests or career goals.

STEM education also places a strong emphasis on personalizing educational experiences to best suit students’ individual learning styles and interests, which means STEM education has something to offer to every student.

I’m struggling to keep up with my science courses. Are there campus resources that can help?

Yes! We would recommend you first meet with your professor to let her/him know where you feel you are falling behind. They will have the best recommendations for where to seek help. There may also be a TA for the course that you can work with.

On campus there are also tutors available at the Center for Teaching, Learning & Research (CTLR):

- **Peer STEM Tutors** that work in the CTLR. They assist students in a wide range of math, science, social science, and related courses, including biology, chemistry, computer science, environmental science, economics, logic, mathematics, physics, psychology, and statistics. Some tutors run weekly drop-in sessions while others work with students in scheduled appointments.
- **STEM and Quantitative Skills Support**

I am interested in the joint engineering programs. What can you tell me?

We would first recommend reading about the Dual Degree Programs on the **Engineering website**.

Middlebury currently has affiliations with three engineering programs:

- **Thayer School of Engineering at Dartmouth**: The dual-degree program with Dartmouth is a 2-1-1-1 program, meaning that students spend their junior year and a 5th year at Dartmouth. If you are wondering whether this program is for you, be sure to read the information about engineering options first. Read more here.
- **Columbia University**: The combined-plan program with Columbia University is a 3-2 program meaning that students study for 3 years at Middlebury (and complete most major and distribution requirements here), and then study for two years at Columbia. Students will receive a B.A. from Middlebury and a B.S. in an engineering discipline from Columbia. If you are wondering whether this program is for you, be sure to read the information about engineering options first. Read more here.
- **Rensselaer Polytechnic Institute**: The engineering program with Rensselaer Polytechnic Institute, Four-Year Affiliated College Program, is a 3-2 program meaning that students study for 3 years at
Middlebury (and complete major and distribution requirements here), and then study for two years at RPI.

At the end, the student receives two degrees: a B.A. from Middlebury, and a B.S. from the engineering school. Since students considering these programs will need to complete all the Middlebury distribution requirements and most of those for a major, plus pre-requisites for an engineering program, within three rather than four years, it is important to plan carefully starting from the first year at Middlebury. Daniel Scharstein, Professor of Computer Science and Pre-Engineering Advisor can be contacted via email here.
