

NativeEnergy 2010 Spring Supply Internship

NativeEnergy is an internationally recognized provider of high quality carbon offsets and renewable energy credits (RECs). We enable our customers to support the construction of clean renewable projects and build sustainable economies for Native Americans, family farmers and local communities. Our clients include many prominent organizations, such as Clean Air-Cool Planet, the Natural Resource Defense Council, "An Inconvenient Truth," Ben & Jerry's, Stonyfield Farm, and Clif Bar. The *NativeEnergy* team is fast-paced and growing quickly to meet the rising challenges of global warming and fossil fuel dependence. www.nativeenergy.com

Internships Details:

Start Date: January 2010

End Date: May 2010

Part time: Part-time, flexible schedule

Internships at *NativeEnergy* are entirely voluntary (unpaid) and awarded on a competitive basis.

Preferred Education/Major: This position is open to graduate students (or mid-career changer) with a degree in Agriculture and Life Sciences, Environment and Natural Resources, or related fields. Advanced undergraduate students are also encouraged to apply.

Internship Personality:

The candidate will be a self-starter, creative, ideas-oriented and a team player. He/She must also be extremely organized, place importance on project ownership, attention to detail, and have the ability to handle a quick pace. Works well in a team environment.

Desired Skills and Qualifications:

- Must have good communication skills and a proficient knowledge of PC computer systems; Excel, Word, Access and Internet Explorer are essential.
- Must have a good attitude and eagerness to learn, with a professional demeanor.
- Demonstrated leadership/participation in campus programs and/or community service activities.

What you will gain:

- Intern will support *NativeEnergy's* supply procurement staff. Supply procurement functions involve identification of new renewable energy supply sources needed to meet sales volumes, quantification of the carbon emission reductions associated with these new sources in accordance with industry standards, contract negotiations, and overall portfolio management.
- Assist in routine tracking and reporting the amount of carbon inventory from company's current supply portfolio and pipeline using database tools (MS Excel, MS Access);
- Research carbon market topics of interest, including carbon quantification standards and methodologies, state/federal renewable energy incentives, and current and pending regulatory issues;
- Support staff in identifying new supply opportunities via web research.

Application Process:

- Applications will be reviewed upon receipt, and offers may be made before the application deadline (12/15/09).
- We are looking for the right person to train as in intern. There will be an opportunity to extend the internship upon the completion of the spring program.
- Please send your resume, a short writing sample, and a cover letter specifying your availability, as well as describing your areas of interest and reasons for interning with *NativeEnergy*.
