Interested in learning more about protecting our water resources, and getting good information to decision-makers? Conduct full-time team research for 10 weeks in Vermont, Rhode Island or Delaware.

**INVESTIGATE:**

- The impact of climate variability and extreme weather events on water quality through sensors.
- How to provide rapid, valuable information to stakeholders for more efficient and better informed decision making.

**PAID SUMMER UNDERGRADUATE RESEARCH INTERNSHIPS IN DE, RI & VT**

$4,500 stipend
Travel expenses provided

**INTERNSHIP DATES:** JUNE 2 – AUGUST 11, 2015
ELIGIBILITY: Students who will be entering their second, third, or fourth year at one of the NEWRnet partner institutions** during 2015 may apply.

THE PROGRAM IS OPEN TO STUDENTS FROM ANY MAJOR.

**Is your school a NEWRnet partner? Visit [http://newrnet.org/redir/ug](http://newrnet.org/redir/ug) for a full list of participating institutions in DE, RI and VT. We also welcome applications from the following participating institutions:

- Alabama A&M University
- Florida A&M University
- Texas A&M University
- Tuskegee University
- University of Puerto Rico
- University of Maryland Eastern Shore

Go to [http://newrnet.org/redir/ug](http://newrnet.org/redir/ug) to complete your online application!

APPLICATION DEADLINE: FEBRUARY 20, 2015

This program funded by the National Science Foundation Grant IIA 1330446
