You bet your nomadic ass it is. Do you want to be homeless? Then you better come check this room for rent out. It has WALLS and a CEILING. BLOCKS THE FUCKIN WIND AND RAIN FOOL!

ZOMG THE LOCATION IS THE SHIT. You can WALK to Washington Avenue from here. So you can get your drink on and do some mackin playa. 10 mins from UH and Rice cause we all about higher education up in here. You could hit Memorial Parkway with a ROCK. But don't. We keep it civilized.

We got carpet up in this hoe too. They wanted to come put in hard wood floors. But I was like FUCK THAT. I don't want my feet to be cold when I get out of bed at night. Carpet. So soft. Transcends the walking barefoot experience.

Man the room... You can put your bed and furniture UP IN HERE!!!! So you can sleep, chill, even EAT. You got a private bedroom! We ain't bunk bedding out this motherfucker.

AWWW SHIT! YOUR OWN PRIVATE BATHROOM!!!! WTF!?!?!? YUH! You can shower and take a shit w/o anyone being up in your business!!! I'm not bullshittin either... I'm talking HOT WATER IN THE SHOWER.

We got ELECTRICITY. POWER ALL YOUR APPLIANCES. Play my Xbox360 because I never do. No need for candles or firewood, because I got LIGHTS and HEAT.

-this pad has doors so people don't come up in yo space son

-this place has windows so you can see outside and shit. WHATSUP NEIGHBORS!

-tennis courts, 2 pools, parking garage, a park in the back, brand new gym so you can get swoll. Sand volleyball court WHAT!

Pic related, its me. Your bad ass new roommate.

@cougarclaws

**IMPORTANT NOTICE ABOUT YOUR DRINKING WATER
E. COLI BACTERIA FOUND IN ONE OF THE SMCMUA'S
WELLWATER SOURCES**

Routine quality control/quality assurance testing of The Southeast Morris County Municipal Utility Authority's (SMCMUA) source waters has detected the presence of E. coli bacteria in one of the SMCMUA's fifteen water sources during December 2009. These bacteria were detected in the untreated, raw water source. At no time was E. coli detected in the treated, potable water delivered to SMCMUA's customers. E. coli bacteria originate from human and animal fecal waste. These microbes can cause short-term effects, such as diarrhea, cramps, nausea, headaches, and other symptoms. They may pose a special health risk for infants, young children, some of the elderly and people with severely compromised immune systems. As part of the EPA's Ground Water Rule, the SMCMUA is required to issue this notice to all of our consumers.

The SMCMUA maintains a comprehensive water testing program and tests its source and treated waters above and beyond state and federal requirements for E. coli and other contaminants. These bacteria were detected during routine voluntary monitoring.

There is nothing you need to do at this time. This is not an emergency. If it had been, you would have been notified immediately. The affected source, which accounts for 4% of the total supply, has been taken out of service. Plans are already being implemented to upgrade the existing treatment to insure that SMCMUA's consumers receive only the highest quality potable water. This source will not return to service until the treatment upgrades have been installed and approved by NJDEP's Bureau of Safe Drinking Water Implementation.

For more information, please contact Frank Marascia, Water Quality/Regulatory Specialist at (973) 326-7230 or fmarascia@smcmua.org. General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 1-800-426-4791.

This notice is being sent to you by The Southeast Morris County Municipal Utilities Authority, State Water System I.D. No. NJ1424001.

Date Distributed: June 2010

Cryptosporidium

Cryptosporidium is a microbial pathogen found in surface water throughout the United States. Although Cryptosporidium can be removed through commonly used filtration methods, the US EPA issued a new rule in January 2006 that requires water systems with higher Cryptosporidium levels in their source water to provide additional treatment. The SMCMUA monitored for Cryptosporidium in its raw surface water during 2006-2008. Sample results do not show a need to provide additional treatment.

Since the Senate recently voted to make English the "national language" of the United States, we thought this would be a good time to rerun this cartoon from 1994...

In-class "jigsaw survey" :

1. What does it mean to say that English is a "global" or "international" language?
2. What comes to mind when you think of "World Englishes"?
3. What comes to mind when you think of "English fever" or "English craze"?
4. Why are you interested in studying "The English Language in a Global Context"?
5. What has caused English to be such a dominant language in today's world?
6. What are the *pros* of English language dominance in the world?
7. What are the *cons* of English language dominance in the world?
8. What questions do you have about English language dominance?
9. How do World Englishes relate to social justice?

10. How does the English language reflect “Anglo” culture?

[Singlish Poem, by anonymous]

from http://www.gse.uci.edu/person/warschauer_m/singapore.html

Wah! I heard we all now got big big debate.
They said future of proper English is at stake.
All because stupid Singlish spoil the market,
want to change now donno whether too late
Other people hear you, say you sound silly.
So like that how to become world-class city?
Basically Singlish got good and got bad.
Aiyah! Everything in life is all like that.
Actually Singlish got one bright side.
I am talking about our national plight
Other people all say we all got no culture.
All we got is a lot of joint business ventures.
So we got no culture to glue us together.
End up we all like a big bunch of feathers.
Wind blow a bit too strong only we fly away.
Everybody all go their own separate ways.
Now we must play Internet otherwise cannot survive.
Next time the only way to make money, or sure to die.
When other countries' influences all enter,
we sure kena affected left, right and centre.
Sekali our Singaporean identity all lost until donno go where.
Even Orang-Utan Ah Meng starts thinking like a Polar Bear.
But still must go I.T. otherwise become swa koo,
only smarter than Ah Meng of the Mandai Zoo.
Wait the whole world go I.T., we still blur as sontong,
next time we all only qualified to sell laksa in Katong.
But actually we all got one "culture" in Singlish.
It's like rice on the table; it is our common dish.
I know this funny "culture" is not the best around
so we must tahan a bit until a better one is found.
Not all the time can marry the best man,
|so bo pian got no prawns, fish also can.
I donno whether you agree with me or not?
I just simply sharing with you my thoughts.
Singlish is just like the garden weeds.
You pull like mad still it would not quit.

Michelle LaFrance, Ph.D. -UMass Dartmouth- miafrance@umassd.edu
Shawna Shapiro, Ph.D. - Middlebury College- sshapiro@middlebury.edu

Sure got some people like and some do not like.
Singlish and English, they'll still live side by side.
