

## MEAT EATEN AT MIDDLEBURY PER YEAR:

Just the chicken, pork, and beef used at the Middlebury dining halls in one year creates

1,805,465 to 2,700,172 lbs of CO<sub>2</sub> equivalents

Which is the amount of CO<sub>2</sub> produced by driving a standard sedan to the **MOON AND BACK** 6 to 9 times!

This Green House Gas will cost the environment an estimated

\$44,810 to \$101,526 dollars

Which would approximately cover **1 to 2 YEARS OF FULL TUITION** at Middlebury College!
